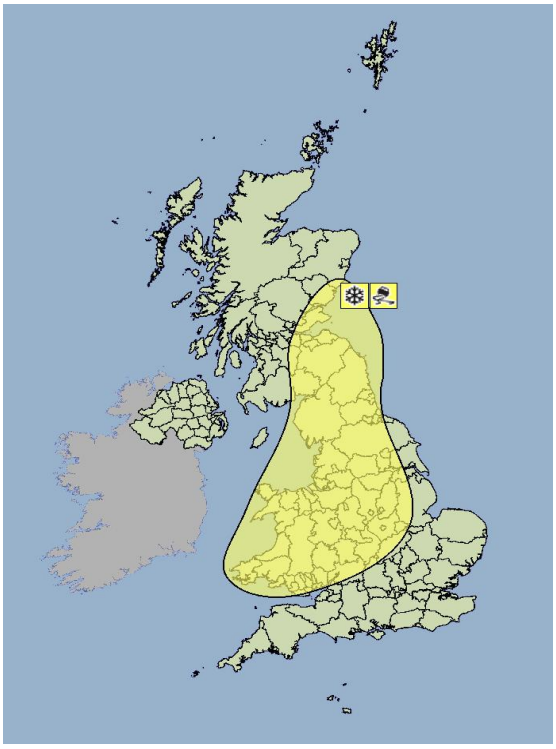
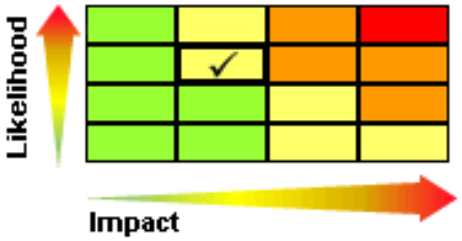
National Severe Weather Warning Service





Chief Forecasters Assessment
Away from coasts, 1-3 cm of snow is possible with up to 5 cm above 200 metres. As skies clear from the west early on Tuesday morning, ice is likely to develop across western Scotland and Northern Ireland.

The Met Office have issued a **Yellow Warning** of **Snow and Ice**

Valid from **06:10 on Tue, 06th Feb 2018** until **15:00 on Tue, 06th Feb 2018**

A spell of sleet and snow will continue to move southeast across the UK on Tuesday, gradually weakening across England and Wales.

Some roads and railways may be affected with longer journey times by road, bus and train services. As rain, sleet and snow clears Northern Ireland and Scotland overnight Monday, ice may form on some untreated roads, pavements and cycle paths.

This is an update to remove the warning from Northern Ireland and much of Scotland (where the snow has now cleared), whilst also extending the southeastern boundary to include the East Midlands.
